Ansari Nagar  
NEW DELHI - 110029

August 2001

The Population for the areas covered by the six registries for each of the years 1990-1996 has been estimated, based on 1981 and 1991 censuses by Dr V. Sreenivas, Assistant Director General, ICMR, New Delhi. Earlier estimates of the population were based on post-censal population estimates based on 1971 and 1981 censuses since the 1991 five year age group populations of the 1991 census was available only in 1996. The incidence rates for all the registry centres have been computed with these new estimates of the population. Therefore there could be some slight variation in the incidence rates published for the same years in earlier NCRP reports. The incident data of the registries have also been updated and revised following rigorous checks for the preparation of this report.

Population based cancer registries provided individual core data. Quality Control checks, tabulations and statistical analysis were done at the Coordinating Unit of NCRP, Bangalore.

The publications of NCRP are intended to contribute to the dissemination of authentic information on cancer incidence by age (Five-year age groups), sex and site (ICD-9).
